No. A/09120/2016/E-Block /CAO/Works(B)

MINISTRY OF DEFENCE
[Office of the JS (Trg) & CAO]

Saving of Electricity Consumption E-Block Hutments

1. Further to our note of even No. dated 02 May 2016.
2. You may be aware that during the summer season there is excess load on our electricity consumption and this office is also facing an acute load problem. In E-Block Hutments there is frequent tripping of power supply, as electricity consumption is more than the sanctioned load. In this connection, you are requested to economise the electricity consumption by adopting following measures: -
 - a) Switch off AC for one hour everyday.
 - b) Keep the AC temperature at or above 25°C.
 - c) Switch off other electrical appliances, when not in use.
 - d) No AC should be operated in power point.
